

IntelliTech is a minority owned small business providing comprehensive IT services and solutions to commercial and government clients. Our mission is to help enterprises solve their toughest technical challenges.

Approach and Differentiators

- **Client-Centric Methodology:** We tailor our services to align with each organization's unique needs and objectives.
- **Diverse Expertise:** Our multi-talented team brings both commercial and federal experience to every engagement.
- **Deep Industry Insights:** We leverage in-depth knowledge and fresh perspectives to address complex challenges effectively.

Past Performance

Advana - Department of Defense - Chief Digital and AI Office - 02/2021 - Present

- **Data Engineering & Operations:** Delivered end-to-end data ingestion, validation, and optimization for enterprise analytics products, ensuring secure and reliable data pipelines for high visibility use cases.
- **Custom Application Development:** Designed and deployed modern web applications using containerized solutions on Kubernetes, incorporating DevSecOps processes for secure, scalable, and efficient operations.
- **Architectural Innovation:** Implemented the Event-Driven Advana Data Operations (ADO) Framework to standardize data onboarding, governance, and analytics at scale across the DoD, enhancing data-driven decision-making.

Company Data

UEI: RZHJP65MFYE3

CAGE: 9Q3M3

NAICS CODES:

541511, 541512, 541513, 541519, 518210, 541611, 541618, 541690, 541990

Core Competencies

Software Development

- Deliver robust, user-centric applications through modern software engineering best practices
- Employ Agile methodologies to accelerate time-to-market and ensure continuous improvement

Data Analytics and Engineering

- Transform raw information into actionable insights using advanced data pipelines and frameworks
- Drive data-driven decisions through real-time analytics, visualization, and predictive modeling

Cloud Solutions

- Enable seamless cloud adoption and migration strategies tailored to each client's environment
- Optimize infrastructure, ensuring scalability, high availability, and cost-effectiveness

DevSecOps Services

- Integrate security at every stage of the development lifecycle, ensuring compliance and resilience
- Automate CI/CD pipelines to streamline releases and enhance collaboration across teams

AI & ML

- Develop intelligent solutions for predictive analytics, anomaly detection, and trend forecasting
- Leverage cutting-edge machine learning techniques to drive innovation and automation
